

► Personal Mastery

Increase your personal effectiveness and see your results sky rocket.

Mahatma Gandhi said “You must be the change you wish to see in the world.” In other words, if you want to grow and develop your business, you must first develop your own skills. As a successful business owner there are many skills you must master in order to grow your business. The foundation of these skills is your personal effectiveness.

It's very important when designing your business that you do so with your end-game in mind. This includes having a crystal clear vision, mission and values. It's also important that you are able to set effective goals and manage your time and resources including your personal motivation. We will show you how when you join us at Personal Mastery.

During this one-day program you will learn skills and tools that will enable you to achieve results faster than you thought possible. You will develop your own vision and mission. You will also identify your values for your business and your life and then align those values to ensure you are moving quickly towards your goals. This is one of our most powerful and popular workshops because of the results that participants achieve.

“Excellent. Opened my eyes to the things I need to improve within myself and the way I work in my business. Thank you.”

Chris Morton, Logic Networks

You will learn:

- The importance of “beginning with the end in mind”
- Tools for developing your vision, mission and values
- How to align your personal and business values to achieve your goals
- Your own motivation strategies and how they impact your behaviour
- How to truly understand the motivation strategies of others
- Time management skills to increase your personal effectiveness
- Techniques for developing your management and leadership skills

This is a hands-on and interactive workshop. You will receive a comprehensive workbook and a copy of the presentation notes.
